

Continuous Integration / Continuous Deployment (CI/CD)

Experience a game-changing solution that redefines the way you deploy entire Acumatica builds, complete with customization packages and third-party product installations. Our CI/CD solution is here to empower you with streamlined, efficient, and consistently reliable deployments.

Elevate your deployment workflow and embark on a journey towards greater efficiency, consistency, and reliability.

Key Features for Unprecedented Control:

- **Multiple Environment Management:** Create and manage multiple environments, whether it's for development, staging, production, or any other specific need. Easily update them as needed, ensuring your deployment process aligns with your evolving requirements.
- **Seamless Product Installation:** Install your products on Staging or Sandbox instances and effortlessly deploy them to your Production environment after testing, ensuring and maintaining the integrity of your deployment process.
- **AWS Pipelines Integration:** Our solution integrates smoothly with AWS and Azure Pipelines, allowing you to leverage the power of their online infrastructure for efficient and effective continuous integration and deployment.

With CI/CD, you're in control of your deployments like never before.

UNLOCK A WORLD OF BENEFITS:

- **Time and Effort Savings:** Automate your deployment process to save precious time and effort. Say goodbye to manual, time-consuming tasks and focus on more value-added activities.
- **Consistency and Reliability:** With CI/CD, you can rest assured that each deployment is executed consistently and reliably. No more worrying about variations or unexpected errors - maintain the highest level of quality every time.
- **Error Reduction:** Automation drastically reduces the risk of human error during the deployment process. Enjoy peace of mind, knowing that your deployments are accurate and error-free.
